

Discovering The Sacred In Everyday Places

A free transformational experiential presentation guaranteed to leave you with immediate, practical, *no-to-low* cost take-away techniques to use at home, office, classroom, or any room for the enrichment of your physical, psychological, social, spiritual, and global well-being.

"Thanks very much, Terry, for the wonderful event. It was quite experiential and felt very much like collaboration and dialogue rather than simply a presentation. You really put your heart and soul into the event. We enjoyed our time tremendously. Thanks for your contribution to humanity. As an Architect of Change, you are helping the world to be more at peace amidst this paradigm shift of awareness we are experiencing!"

Jim Arsenault - Integral Life and Business Coach

"When I heard about what Terry does (SpaceTherapy) I was immediately intrigued because of my academic background. I already had a sense that one's environment has an impact on behavior and well-being. What Terry does is beyond traditional architecture and interior design, and has none of the "fluffy" science of feng shui.—Terry is not only a passionate presenter; he is deeply knowledgeable and compassionate to your needs. The changes we've made are tangible and noticeable right away!"

Jennifer Williams, Home Owner
& Neuromarketing Consult. @ Verillance

"Excellent! A presentation that anyone from left brained pragmatics to right-brained visionaries will both benefit from and enjoy."

William Treadwell, Business Owner

Saturday, April 1, 2017
2:00 - 3:30 pm (arrive early)
FORBES LIBRARY - Community Room
20 West Street, Northampton, MA

Terry Cline is a SpaceBehavior® Architect, Consultant and Public/Keynote Speaker. As Founder of DwellRight with over thirty years of professional experience offering Residential Green Design and LifeStyle/Space Integration for Home and Office, Terry engagingly integrates principles from architectural and interior design, behavioral psychology, neurology, immunology, the ancient art and science of placement, and advanced common sense. He offers presentations nationwide, has been interviewed by Dwell and Natural Home Magazines, Public Broadcasting Network, and The Green Talk Radio Network. He also participated in a television program about the beneficial effects of well-designed personal environments, and was recently honored as a candidate to lead a transformational 'House Whisperer' series for a major cable TV network.
